Overview of Guidelines for AIDS Prevention

Dissemination, enlightenment, and education

<Measures mainly implemented by the government: general dissemination/enlightenment>
- Providing basic information and correct knowledge about HIV/AIDS
- Development of dissemination/enlightenment methods, preparation of manuals on dissemination/enlightenment methods

<Measures mainly implemented by local governments: individual dissemination/enlightenment>
- Dealing with young people and homosexuals
  AIDS control programs for young people / Prevention enlightenment programs for homosexuals, etc.

Improvement of test/consultation system

<Measures mainly implemented by local governments: providing information on test/consultation>
- Creation of HIV test promotion week (June 1 to 7 every year)
- Reconstruction of system to provide information regarding test/consultation
- Development of test methods, preparation of manuals on test/consultation methods

<Measures mainly implemented by local governments: improvement and enhancement of test/consultation system>
- Establishment of accessible test system (night time on weekdays, holidays, rapid test, etc.)
- Formulation of annual test plans and implementation of test/consultation

Reconstruction of system to provide medical care (378 core hospitals)

<Measures mainly implemented by local governments: development of new methods>
- Establishment of outpatient team medical care
- Discussion on hospital-clinic cooperation › creation of hospital-clinic cooperation model programs

<Measures mainly implemented by local governments: securing comprehensive treatment system in prefectures>
- Securing medical care system in prefectures including establishment of core hospitals
- Support for cooperation among hospitals through establishment of conferences

New methods to support implementation of measures

New methods to support implementation of measures
- Enhancing cooperation with NGOs for implementation of measures including dissemination and enlightenment
- Promotion of comprehensive AIDS control measures through conducting regular conference among related ministries and agencies
- Focused support for prefectures taking into consideration evaluation of their policies
  →Focused support for prefectures, etc. (16 local public entities) with large number of infected people/patients
