VETERINARY CERTIFICATE

I,, being an official veterinarian of the New Zealand Ministry of Agriculture and Forestry do hereby certify with respect to the animals identified in the zoosanitary certificate that:

- 1 The animals were born and kept since birth in an “establishment” where no cases of haemorrhagic fever with renal syndrome, hantavirus pulmonary syndrome, leptospirosis, monkey pox, rabies, *Yersinia pestis* and tularemia was reported for at least 12 months prior to shipment.
- 2 The Japanese government have been informed of these “establishments” and they meet the required standards (see notes).
- 3 The animals were examined within 72 hours prior to the scheduled date of shipment and found to be clinically healthy and free from clinical signs of rabies and fit to travel.

VETERINARY CERTIFICATE

I,, being an official veterinarian of the New Zealand Ministry of Agriculture and Forestry do hereby certify with respect to the animals identified in the zoosanitary certificate that:

- 1. The animals have been stored since birth in a place that is in a storage establishment meeting all of the following, that has been isolated from other areas, and in which there have been no other animals than such rodents.
 - 1.1. Feeding control (hereafter including the management of records of the animals and their breeding, shipment and death) and sanitary control are carried out under the supervision of a committee consisting of members concerned including veterinarians in the establishment.
 - 1.2. Appropriate measures are taken to ensure that the intrusion of animals from outside is prevented.
 - 1.3. When introduced into the establishment, the animals are confirmed not to be contaminated with pathogens of infectious diseases in order to prevent the intrusion of pathogens of infectious diseases that may infect humans through animals.
 - 1.4. Examinations are conducted periodically on the animals stored in the establishment to confirm they are not contaminated with pathogens of infectious diseases. (see notes)
 - 1.5. Information concerning the feeding and sanitary controls of the animals is recorded in documents and such documents are retained.
- 2. Since births, the animals have not been used in any study with pathogens of infectious disease or have not come in contact with any animal used in such a study.

VETERINARY CERTIFICATE

I, an Official Veterinarian of the New Zealand Ministry of Agriculture and Forestry certify after due enquiry, in regards to the birds or hatching eggs identified in this export certificate that:

1 The birds for export or the parent birds for hatching eggs were:

EITHER 1.1 born and raised in captivity in New Zealand

OR 1.2 if imported into New Zealand have been resident since hatching or for a minimum of 90 days prior to the scheduled date of shipment and a certificate of origin is available

(Delete as appropriate)

2 New Zealand is free from Highly Pathogenic Avian Influenza (HPAI), West Nile Virus and Newcastle Disease (with an ICPI greater than 0.2).

3. The birds were examined within 24 hours prior to the scheduled date of departure and found to be in good health and free from clinical signs of contagious diseases and external parasites.

4. The birds were healthy and fit to travel.

5. For at least 21 days prior to the proposed date of shipment or since hatching the birds or parent birds were kept in an establishment where prevention measures against mosquitoes have been taken. (*delete as appropriate)

6. For wild birds that have not been raised since hatching, this establishment (from point 5) must be an approved pre-export isolation facility.
