

2 Rates of Estimated Patients (per day, per 100,000 population)

The rates of estimated patients (per 100,000 population) in Japan are 1,090 in inpatients and 5,376 in outpatients

(1) Rates of estimated patient (per day, per 100,000 population) by sex and age group

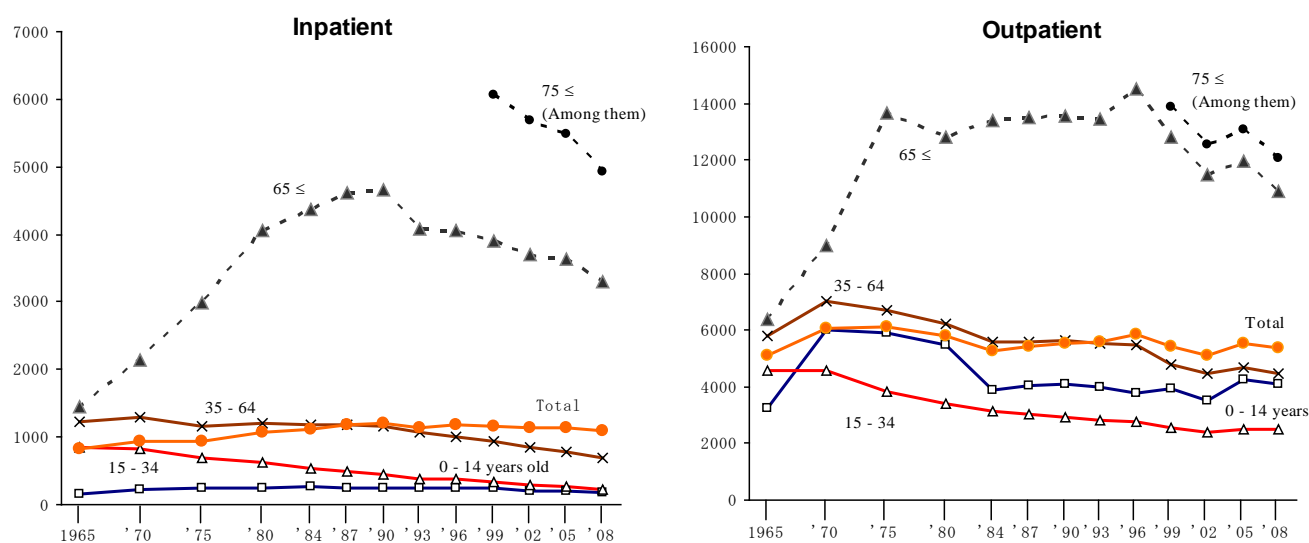

The rate of estimated patients (per day) by sex is 1,028 males and 1,150 females in inpatients, and 4,688 males and 6,031 females in outpatients. By age group, the rates generally decreased when compared with 2005. In inpatients, age groups of 5 to 9 years old and 10 to 14 years old have the lowest rates at 97, respectively, and the rates increase as the age group becomes older. In outpatients, age group of 15 to 19 years old is the lowest at 1,906 and 75 to 79 is the highest at 12,855 (Table 8, Figure 4).

Note: Total includes patients of unknown age.

Figure 4 Yearly Trend in the Rates of Estimated Patients (per day) by Age Group (per 100,000 population)

(2) Rates of estimated patients (per day, per 100,000 population) by disease and injury

The rates of estimated patients by classification of diseases are from the highest in inpatient, “V Mental and behavioural disorders” (236), “IX Diseases of the circulatory system” (219), and “II Neoplasms” (125). Classification of diseases from the highest in outpatients are “XI Diseases of the digestive system” (979), “XIII Diseases of the musculoskeletal system and connective tissue” (740), and “IX Diseases of the circulatory system” (701) (Table 9).

(3) Rates of estimated patients (per day, per 100,000 population) by prefecture

In the rates of estimated patients by prefecture (place of residence of patient) among inpatients, the prefecture with the highest rate is Kochi at 2,191 then Kagoshima at 1,964 and Nagasaki at 1,860 follow. The lowest prefecture is Kanagawa with 705, and then Chiba with 740 and Saitama with 741 follow.

Among outpatients, the highest prefecture is Kagawa at 6,548 then Saga with 6,516 and Nagasaki with 6,439 follow. The lowest prefecture is Okinawa at 3,984, then Kanagawa with 4,442 and Saitama with 4,586 follow (Figure 5).

Figure 5 Rates of estimated patients (per day) by prefecture (place of residence of patient) (per 100,000 population)

October 2008

Note: The rate of estimated patients by prefecture was calculated from places of residence of patients.
