

4. Dose Distribution of Workers for Decontamination and Related Works, etc.  
by Number of Engaged Projects in a Year (2014)

| Annual dose (mSv) \ No. of engaged projects | No. of engaged projects |                 |                |              |             |             | Total no. of workers (%) |        |
|---|-------------------------|-----------------|----------------|--------------|-------------|-------------|--------------------------|--------|
|   | 1                       | 2               | 3              | 4            | 5           | 6 or more   |                          |        |
| Dose ≤ 1                                    | 21,428                  | 4,216           | 603            | 95           | 7           | 9           | 26,358                   | (76.2) |
| 1 < Dose ≤ 5                                | 3,063                   | 3,707           | 1,175          | 261          | 36          | 1           | 8,243                    | (23.8) |
| 5 < Dose ≤ 10                               | 1                       | 7               | 1              | 0            | 0           | 0           | 9                        | (0.0)  |
| 10 < Dose ≤ 15                              | 0                       | 1               | 0              | 0            | 0           | 0           | 1                        | (0.0)  |
| 15 < Dose ≤ 20                              | 0                       | 0               | 0              | 0            | 0           | 0           | 0                        | (0.0)  |
| 20 < Dose ≤ 25                              | 0                       | 0               | 0              | 0            | 0           | 0           | 0                        | (0.0)  |
| 25 < Dose ≤ 30                              | 0                       | 0               | 0              | 0            | 0           | 0           | 0                        | (0.0)  |
| 30 < Dose ≤ 40                              | 0                       | 0               | 0              | 0            | 0           | 0           | 0                        | (0.0)  |
| 40 < Dose ≤ 50                              | 0                       | 0               | 0              | 0            | 0           | 0           | 0                        | (0.0)  |
| 50 < Dose                                   | 0                       | 0               | 0              | 0            | 0           | 0           | 0                        | (0.0)  |
| Total no. of workers (%)                    | 24,492<br>(70.8)        | 7,931<br>(22.9) | 1,779<br>(5.1) | 356<br>(1.0) | 43<br>(0.1) | 10<br>(0.0) | 34,611<br>(100.0)        |        |
| Mean dose (mSv)                             | 0.5                     | 1.0             | 1.3            | 1.4          | 1.8         | 0.6         | 0.7                      |        |

[Notes to the table]

• How to read the table entries: The number “1,175” in the box of the annual dose row “1 < Dose ≤ 5” and the number of engaged projects column of “3” means that there were 1,175 workers who were engaged in 3 projects of decontamination and related works, etc., and whose radiation doses were in the range of greater than one and less than or equal to five millisieverts in 2014.

• Data based on registration as of 8 June 2015
