Note: Although the EU establishes a MRL of 0.1 ppm for the muscle, the fat, the liver, the kidney, (sulfonamide compounds), and the milk of an animal as the sum of all substances categorized as sulfa drugs, Japan will establish PR-MRLs for individual substances, standards taking into consideration Codex and other country's standards.

For other terrestrial mammal's milk, the PR-MRL was harmonized with the corresponding PR-MRLs for sheep and goat.
