Note: 1. 5 countries of the highest contribution rate in 2009 are: (1)U.S.A (22.000%), (2) Japan (16.632%), (3) Germany (8.581%), (4) U.K. (6.645%), (5) France (6.304%)

2. Since the ILO has a reduced-payment system for countries which pay their contribution early, the ratio of Japanese contribution in the total contribution of member states does not always match the Japanese contribution rate
