## Updates to the International Classification of Diseases for Oncology, third edition (ICDO-3)

This document provides a listing of all official additions, changes, and revisions to the International Classification of Diseases for Oncology, third edition (ICD-0-3) as at Sep 01 2011 and has been approved by the IARC/WHO Committee for ICD-0-3. Any comments should be sent to ICDO3@iarc.fr, or at whofic@who.int . The changes become valid from 1 January 2012.

In 2010, the WHO/IARC ICD-O Update Committee was established. Modifications to the classification are recommended to the committee by the international boards that review the WHO Classification of Tumors Blue Book series.

Relevant changes in other language versions of ICD-O and in related tools will also have to be made and disseminated by the appropriate authority.

(Note: Every effort has been made in the following pages to reproduce the updates to the ICD-O in an understandable format. Page references have not been used in all instances since these do not apply to electronic and other language versions of the Classification.)

This document is not issued to the general public, and all rights are reserved by the World Health Organization (WHO). The document may not be reviewed, abstracted, quoted, reproduced or translated, in part or in whole, without the prior written permission of WHO. No part of this document may be stored in a retrieval system or transmitted in any form or by any means – electronic, mechanical or other – without the prior written permission of WHO. Data files may however be updated for non-commercial use or were mentioned within existing agreements with WHO.
