Instructors
Karel Moons, PhD
Professor of Clinical Epidemiology
Julius Center for Health Sciences & Primary Care
Leon Box, PhD
Assistant Professor of Clinical Epidemiology
Julius Center for Health Sciences & Primary Care

Course description
Diagnostic research in the past focused particularly on estimating the sensitivity and specificity of individual diagnostic tests. This course will demonstrate that this so called 'test research' is not necessarily the same as diagnostic research. Furthermore, we will widen the horizon by proposing modern methods of diagnostic research and data analysis in which a patient's test result can and should be considered in the context of other patient characteristics or test results.

Prerequisites and fee
Understanding of fundamental concepts in clinical research and experience with basic biostatistical analyses. Participation is free for participants from Kitasato University, Keio University, Juntendo University and affiliated hospitals.

Registration and information
Registration by November 18 at the [KCRC: info@kitasato-crc.org](mailto:info@kitasato-crc.org) or call 042-777-6308. More information can be found at <http://www.kitasato-crc.org/edu/adr2008/>
