IV: SANITARY INFORMATION

1. The animal(s) show(s) no clinical signs of rabies at the time of shipment.
2. The animal(s) has/have been kept since birth in a storage facility where infectious diseases* designated in the below have not been confirmed for the past 12 months (This storage facility is meeting the standards** defined by the Minister of Health, Labour and Welfare of Japan).

* "disease" in relation to rodents means :

Plague, rabies, mpox, hemorrhagic fever with renal syndrome, hantavirus pulmonary syndrome, tularemia, and leptospirosis

** "standards" in relation to rodents means :

1. The construction of the facility must be appropriate in order to prevent the intrusion of animals from outside.
2. Sanitary controls, such as disinfection, must be periodically implemented.
3. No outbreak of plague, rabies, mpox, hemorrhagic fever with renal syndrome, hantavirus pulmonary syndrome, tularemia, and leptospirosis has been clinically reported in human beings and animals in the facility for the past 12 months, and necessary measures have been taken in order to prevent the outbreak of these infectious diseases.
4. The data regarding the sanitary and feeding control of animals (including records of the introduction, breeding, death and shipment of animals) must be recorded and be kept adequately.

I, the undersigned, certify that the animal(s) described above meet the requirements.

IV: SANITARY INFORMATION

1. The animal(s) has/have been stored since birth in a place that is in a storage facility meeting all of the following, that has been isolated from other areas, and in which there have been no other animals than such rodents.
 - (1) Feeding control (hereafter including the management of records of the animals and their breeding, shipment and death) and sanitary control are carried out under the supervision of a committee consisting of members concerned including veterinarians in the facility.
 - (2) Appropriate measures are taken to ensure that the intrusion of animals from outside is prevented.
 - (3) When introduced into the facility, the animals are confirmed not to be contaminated with pathogens of infectious diseases in order to prevent the intrusion of pathogens of infectious diseases that may infect humans through animals.
 - (4) Examinations are conducted periodically on the animals stored in the facility to confirm they are not contaminated with pathogens of infectious diseases.
 - (5) Information concerning the feeding and sanitary controls of the animals is recorded in documents and such documents are retained.
2. Since births, the animal(s) has/have not been used in any study with pathogens of infectious disease or have not come in contact with any animal used in such a study.

I, the undersigned, certify that the animal(s) described above meet the requirements.
