Part II: Certification

Original Replacement

II.a. Certificate reference No

II.b. Reference to original certificate if replacement

II.2 Animal health attestation for origin of milk

I, the undersigned official veterinarian certify that the above mentioned dairy products comply with the following conditions:

II.2.1.

All the requirements of « Animal Health Requirements for raw milk and/or milk products to be exported to Japan from listed countries » are satisfied.

Dairy products have been produced from raw milk collected only in Norway, and have been produced, packaged and stored only in Norway.

II.2.2.

The dairy farms are subject to supervision and inspection from the Norwegian Food Safety Authority to assure that the farm are in accordance with the regulation and follows good farming practice as milking animals that show no clinical signs of contagious diseases nor mastitis. The animals were clinically healthy at the time the milk was obtained.

II.2.3.

- The milk and dairy products originate from Norway that is declared free from foot-and-mouth disease in accordance with the relevant OIE Standard by the competent authority of Norway :
 - o where the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the competent authority;
 - o all introduction of species susceptible to the relevant diseases come from an area declared free from disease, and ;
 - o species susceptible to the relevant diseases are not vaccinated against relevant diseases;
 - o where there are a surveillance scheme to control these disease ;
 - o in case of foot-and-mouth disease in Norway, the Norwegian Food Safety Authority will immediately suspend issuing the health certificate for milk products for export to Japan and notify the Japanese animal health authority.
- The milk and dairy products come from herds free from tuberculosis and brucellosis.
- The milk and dairy products originate from Norway that have been declared by OIE as free from foot-and-mouth disease since 1952. The milk and dairy products come from herds that are not infected with foot-and-mouth disease nor under the suspicion of being infected at the time of milk collection and are not vaccinated. The product was processed in a foot and mouth disease-free country, without vaccination.
- The milk or the milk from which the dairy product was made originated from a country recognized by the OIE as free from Lumpy skin disease.
