Veterinary Certificate for milk products from cloven-hoofed animals to be exported to Japan from Kingdom of Bhutan

Certificate No. :
Date of issue :
A. Details of dispatched consignment
A-1. Exporting country:
A-2. Container No. :
A-3. Seal No. :
A-4. Shipping mark :
A-5. Type of packages :
A-6. Name and address of consignor :
A-7. Name and address of consignee :
A-8. Mode of Shipment :
B. Identification of products (Annex form can be used if needed)
B-1. Type of products (e.g. Cheese, Butter) :
B-2. Net weight :
B-3. Number of packages :
B-4. Date of production :
B-5. Animal species of dairy ingredients :
B-6. Country of origin:
B-7. Establishment number, name and address :
B-8. Purpose of use (please tick the appropriate box) :
□ Human consumption
Animal consumption (cloven-hoofed animals / cloven animals / pet food)
☐ To be determined (likely to use for cloven-hoofed animal consumption) ☐ Other ()
Remarks :
C. Kind of processing treatment
C-1. A foot-and-mouth disease(FMD) virus inactivation treatment of milk products has been carr
out in any stage of production by any of the following methods (please tick the appropriate bo
[NOT intended for cloven-hoofed-animals consumption]
□a minimum temperature of 132°C for at least one second in liquid form (UHT)
□ (pH less than 7.0) a minimum temperature of 72°C for at least 15 seconds in liquid form (HTST) □ (pH 7.0 or greater) HTST applied twice
maintaining a pH less than 6 for at least one hour

[Intended for cloven-hoofed animals consumption (or likely to use for this purpose)]
□HTST combined with another physical treatment, maintaining a pH less than 6 for at least one hour or additional heating to at least 72°C combined with desiccation
UHT combined with another physical treatment, maintaining a pH less than 6 for at least one hour or additional heating to at least 72°C combined with desiccation
C-2. Name of country where C-1 was carried out (if different from A-1) :
D. Certification
I, the undersigned regulatory authority, certify that:
1.Milk products to be exported to Japan have been produced from raw milk obtained from clinically healthy animals, and it is prohibited to use raw milk obtained from animals infected with animal infectious diseases as an ingredient according to legislation of the exporting country.2.Raw milk used in the production of milk products to be exported to Japan has originated from herds which were not infected or suspected of being infected with FMD at the time of milk collection.
·
3. Milk products to be exported to Japan have been produced, packaged and stored from raw milk
collection to shipment of final products to Japan without contamination by pathogens of anima
infectious diseases or commingling with milk products which do not meet Articles 1 to 3 in Anima
Health Requirements for milk products to be exported to Japan from countries other than Listed countries.
4.Packages and containers such as carton boxes for milk products to be exported to Japan have
been clean and hygienic.
5. The products described here was processed under sanitary conditions in accordance with laws
and regulations of Bhutan, which are at least equivalent to laws and regulations of Japan.
