

Let's check the implementation status of COVID-19 infection control at workplaces !

Please mark <input checked="" type="checkbox"/> if answer is yes.	5 points of the action on COVID-19 infection control
<input type="checkbox"/>	Promote 'teleworking' and 'staggered working hours' etc.
<input type="checkbox"/>	Set up a rule and foster an environment that workers can take rest at home without hesitation if they feel sick.
<input type="checkbox"/>	Keep distance between workers, ventilate regularly and provide partitions at the workplace in order to avoid "3Cs", i.e., 1) Crowded places, 2) Close-contact setting with conversation in loud voice, and 3) Closed spaces with poor ventilation.
<input type="checkbox"/>	Take measures to avoid "'5 Scenes'" which increase the risk of infection' in the resting room, changing room and at eating and drinking places.
<input type="checkbox"/>	Take basic measures to prevent infection by washing hands, using hand sanitizer, practicing "cough etiquette" and wiping places people often touch with sanitizer.

- ① If any of above is unchecked,
 - Please refer 'practical examples for the prevention of COVID-19 at workplaces' printed on the leaflet "Let's check the implementation status of COVID-19 infection control at workplaces!" as a reference and take measures at the workplace.
- ② If all are checked,
 - Make a good use of "Checklist for the prevention of COVID-19 spreading at workplaces" posted on Ministry of Health, Labour and Welfare web site and consider continuously between labor and management about measures conforming to actual situations.
