Option B SANITARY INFORMATION

I, Dr, a duly authorised government veterinary officer, hereby certify that:

The animals have been kept since birth in a place that is in a storage establishment meeting all of the following that has been isolated from other areas and in which there have been not other animals than such rodents.

The storage establishment of rodents meets the requirements below.

1.
 - (1) Feeding control (herein after including the management of records of the animals and their breeding, shipment and death) and sanitary control are carried out under the supervision of a committee consisting of members concerned including veterinarians in the establishment.
 - (2) Appropriate measures are taken to ensure that the intrusion of animals from the outside is prevented.
 - (3) When introduced into the establishment, the animals are confirmed not to be contaminated with the pathogens of infectious disease in order to prevent the intrusion of infectious disease that may infect humans through animals.
 - (4) Examinations are conducted periodically on all the animals stored in the establishment to confirm that they are not contaminated with pathogens of infectious disease.
