調査リスト項目説明一覧

株式会社ニチマイ

1) 米国国立公文書館 調査リスト 項目説明一覧

項目	説明
①リスト番号	NARA+4桁連番等 ユニークな管理番号。
②KeyWord	検索に使用したキーワード。
③Media (Text/Microfilm/Aerial photo/Motion picture/Photo)	テキスト、マイクロフィルム、空中写真、動画、写真といった媒体の種類。
④RG #	レコードグループとは、米国政府の各機関や省庁の組織や機能によって分けられた資料記録群のことで、米国国立公文書館には500以上の資料記録群がある。
⑤Entry #	それぞれのレコードグループにはさらに下部組織や機能毎にシリーズと呼ばれるまとまりがある。このまとまりをエントリーと呼ぶ。レコードグループによっては 数百を超えるシリーズがある。
⑥Box #	箱番号。通常テキスト資料の箱は、書類が約1000枚程度入るリーガルサイズの箱と書類が3000枚程度入るミカン箱サイズの箱がある。写真の場合はレコードグループによって異なるが、基本的にはリーガルサイズの箱または靴箱のような箱が多い。
⑦Microfilm/Aerial photo/Motion picture/Photo#	マイクロフィルム、空中写真、動画、写真等媒体毎の資料番号。(テキストとは異なる。)
⑧Title	資料のタイトル。
⑨Date	資料が作成された日付。
⑩Caption	キャプション。資料の概要。オンラインの検索では、多くの場合資料の概要は掲載されていない。
⑪数量(枚)	ダウンロード資料の枚数。
⑫収集済	ダウンロードにて収集ができた資料には「1」となっている。
⑬収集資料ファイル名	ダウンロードファイル名及びダウンロードサイトURL。
⑭現地収集可	ダウンロードにて収集できなかった資料で現地で収集が可能だと思われる資料には「1」となっている。
⑮備考	現地で収集不可である理由や、その他お伝えしたほうが良いと思われる情報。
⑯現地収集可サイト情報	ダウンロードにて収集した資料以外の資料情報が記載されている米国国立公文書館公開目録情報URL。

2) トルーマントルーマン大統領図書館 調査リスト 項目説明一覧

項目	説明
①リスト番号	NARA+4桁連番等 ユニークな管理番号。
②KeyWord	検索に使用したキーワード。
③Series	トルーマン大統領図書館の場合は、米国公文書館の資料とは異なる構成であるが、シリーズは、関係機関や関係者によって分かれている。
④Box #	資料箱番号。(トルーマン大統領図書館のテキスト資料のサイズは、現地に行ってみないとわからないが、おそらく米国国立公文書館に準じたものであると思われる。)
⑤Title	資料のタイトル。
⑥Date	資料が作成された日付。
⑦Caption	キャプション。資料の概要。オンラインの検索では、多くの場合資料の概要は掲載されていない。
⑧数量(枚)	ダウンロード資料の枚数。
⑨収集済	ダウンロードにて収集ができた資料には「1」となっている。
⑩収集資料ファイル名	ダウンロードファイル名及びダウンロードサイトURL。
⑪現地収集可	ダウンロードにて収集できなかった資料で現地で収集が可能と思われる資料には「1」となっている。
⑫備考	現地で収集不可である理由や、その他お伝えしたほうが良いと思われる情報。
⑬NARA site info (for internal use)	米国現場で調査をする上で有効と思われる米国国立公文書館公開目録情報URL。

①リスト番号	②KeyWord	③Media (Text/Microfilm/Aerial photo/Motion picture/Photo)	④RG #	⑤Entry #	⑥Box #	⑦Microfilm/Aerial photo/Motion picture/Photo#	⑧Title	⑨Date	⑩Caption	⑪数量 (枚)	⑫収集済	⑬収集資料ファイル名	⑭現地収集可	⑮備考	⑯ 現地収集可サイト情報

NARA_0064	Atomic Bomb	Text	243	Record Group 243: Records of the U.S. Strategic Bombing Survey, 1928 - 1947	2 I-10	47-139	Published Reports of the European and Pacific Surveys, 1945 - 1947	1945 - 1947	This series consists of reports of surveys of bombing in the European and Pacific theaters of war during World War II. The first three European Survey reports are general analyses of the results of strategic bombing in the European war. Most European reports, however, concern either the physical damage done to key industrial plants in Germany and German-occupied Europe or the economic consequences of aerial attacks on the plants. A number of more general studies discuss the consequences of Allied aerial attacks on one or more German industries, such as the oil, rubber, and chemical industries. Besides the general economic studies, industrial reports, and plant reports, other studies cover the effects of bombing on certain urban areas, on German health, and on civilian morale. The seven Military Analysis Division reports relate to such subjects as Allied bombing accuracy, weather factors in bombardment operations, the defeat of the Luftwaffe, Royal Air Force operations, and Operation CROSSBOW. The last nine studies of this subseries deal with destruction to German transportation and utilities systems. The following three European Survey reports exist only in typescript: "Ministerial Report on Chemicals," Oil Division (No. 114); "Ministerial Report on German Rubber Industry," Rubber Branch, Oil Division (No. 129); and "German Military Railroad Traffic," Transportation Division (No. 204). The Pacific Survey reports also include three general analyses and a large number of reports relating to the effects of Allied attacks on Japanese plants, industry, transportation, urban areas, health and morale. In addition, the Pacific studies include a number of reports on the effects of the atomic bombings of Hiroshima and Nagasaki and on the bombardment of the Japanese coast by U.S. Navy vessels and a number of evaluations of photographic intelligence in the Japanese Homeland. The Military Division and Naval Analysis Division studies relate to the Japanese Army Air Force and the U.S. Army and Navy air and sea operations in the Pacific. Many reports are accompanied by "original drawings" and photographs. A few of the reports are missing.				1		https://catalog.archives.gov/id/560289
NARA_0065	Atomic Bomb/Atomic bomb diffusion	Text	319	Record Group 319: Records of the Army Staff, 1903 - 2009	P 3	1-32	Background Files to "Manhattan: The Army and the Atomic Bomb", 1959 - 1985	1959 - 1985	This series consists of drafts, memorandums, notes, correspondence, maps, summaries and transcripts of interviews, copies of documents, published articles, organization charts, critiques, reports, photographs, and bibliographies, relating to the history of the role of the U.S. Army in developing the atomic bomb. These records include notes and transcripts of interviews with General Lesley R. Groves; a summary of a June 21, 1961, interview with former President Harry S. Truman; and a summary of an interview with Mrs. Jean O'Leary, personal secretary to General Groves from June 1941 to April 1947. There is also a directory of officers assigned to the Manhattan District, August 16, 1942 to June 30, 1946.				1	Restricted - Possibly: 著作権に関わるような資料が入っているかもしれない。	https://catalog.archives.gov/id/1945576

NARA_0111	Atomic Bomb fallout	Sound Recording	326	Record Group 326: Records of the Atomic Energy Commission, 1923 - 1978		326-Pla-74	Jack Carney's interview of Dr. Ernest Sternglass	1955 - 1971	This audio recording is of an interview of Dr. Ernest Sternglass, Professor of Radiation Physics at the University of Pittsburgh, by Jack Carney, Professor Sternglass' research was on the long range effects of radioactive fallout. He believed the bombing of Hiroshima and Nagasaki in Japan in World War Two, were not useful in determining the long range effects of radioactive fallout, as the cloud formations from the bombs moved over the ocean. He also believed the nuclear testing that occurred in Nevada had proven his hypothesis, given the state's infant mortality rate.				1	これは動画の検索の中に入っていたものだが、媒体は音声テープである。原子爆弾の放射性降下物についてのインタビューをピッツバーグ大学の教授にしたもの。Restricted - Possibly: Restricted - Possibly: 使い方によっては、著作権に関わる場合もあるかもしれない。	https://catalog.archives.gov/id/1154503

NARA_0116	Atomic Bomb	Still Photo	243	Record Group 243: Records of the U.S. Strategic Bombing Survey, 1928 - 1947	243-HP	1-4	Photographs Used In The Report Effects of the Atomic Bomb on Hiroshima, Japan, 1947 - 1947	1945-1947	As soon as it was considered reasonably safe to enter the city of Hiroshima after the atomic bombing of August 6, 1945, numerous investigations were undertaken by different agencies. The Physical Damage Division of the United States Strategic Bombing Survey (USSBS) investigated conditions in the city from October 14 to November 26 in an effort to chart the physical damage created by the bomb. The division took photographs to illustrate their findings and USSBS's final three-volume report, Effects of the Atomic Bomb on Hiroshima, Japan. The report was published in May, 1947. The photographs in this series were used to illustrate the final report and show damage to buildings, utilities, and industries.			1		https://catalog.archives.gov/id/540224

NARA_0122	Atomic Bomb	Still Photo	77	Record Group 77: Records of the Office of the Chief of Engineers, 1789 - 1999	77-MDH	1	Photographs of Atomic Bomb Damage to Hiroshima and Nagasaki, 8/1945 - 8/1945	8/1945	The prints and copy negatives in this series were collected by the Corps of Engineers, Manhattan District, from the Atomic Energy Commission's Office of Information Service. Along with 77-AEC, this series depicts the devastating effect of the atomic bomb blasts at Hiroshima and Nagasaki which hastened the end of the war with Japan. Although the photographs are primarily concerned with physical damage, there are a few shots of individuals burned by thermal radiation. The effects of the blasts on steel frame buildings, concrete structures, watermains, bridges, asphalt, wooden structures and underground tunnels, along with their approximate distance from ground zero, are all documented here. The photographs were used as illustrations in the unpublished "Manhattan District History" prepared by the Adjutant General's Office (TAGO) Department of Army 1948. Most of the prints have corresponding negatives. For additional photographs on this subject, see 77-AEC and Record Group 243, Records of the U.S. Strategic Bombing Survey. In NNMH, Record Group 394 there is an unpublished "Manhattan District History" containing photographs of development of atomic bomb and other activities related to it and atomic energy. NNMH handles requests and inquiries.				1	この資料はマイクロフィッシュ資料である。	https://catalog.archives.gov/id/519684
NARA_0123	Atomic Bomb	Still Photo	77	Record Group 77: Records of the Office of the Chief of Engineers, 1789 - 1999	77-AEC	2	Photographs of Atomic Bomb Damage to Hiroshima and Nagasaki, 8/1945 - 8/1945	8/1945	As with series 77-MDH, these prints and copy negatives were collected by the Manhattan Engineering District of the Corps of Engineers from photos created by the Atomic Energy Commission and other sources depicting the widespread destruction created by the detonation of the first two atomic bombs. Along with a few prints of thermal radiation burns to individuals, there are numerous photographs of physical destruction throughout the two cities. In addition, there are photographs of the mushroom clouds and two views of the type of atomic bombs detonated over the cities. Most of the prints have corresponding negatives.				1	ネガとプリント。2箱のうち、一つは、マイクロフィッシュの箱。	https://catalog.archives.gov/id/519383

NARA_0142	Atomic Bomb	Still Photo	77	Record Group 77: Records of the Office of the Chief of Engineers, 1789 - 1999	77-VH	1	Photographic Report of Major Noland Varley on the Physical Effects of the Atomic Bombing of Hiroshima, 1945 - 1945	1945	The U. S. atomic energy research program began in 1939 with the appointment by President Roosevelt of the Advisory Committee on Uranium. The Committee and the project were transferred to the National Defense Research Committee in June 1940 and later assigned to the S-1 Section. The S-1 Section was transferred to the Office of Scientific Research and Development in November 1941. In June 1942 the programs were transferred to the War Department, Corps of Engineers. The Manhattan Engineering District (MED) of the U. S. Corps of Engineers was established in August 1942 for the "Development of Substitute Materials" (DSM) and was responsible for the supervision of the research, development and testing, plant construction and production of the atomic bomb, the "Manhattan Project." In September 1942 the MED was directed by the Military Policy Committee and after April 1943 by the War Department. An atomic bomb produced under the Manhattan Project was dropped on Hiroshima, Japan, August 6, 1945. The MED organized a Manhattan Project Atomic Bomb Investigating Group August 15, and made preliminary studies, among others, of the bomb's damage to physical structures in Hiroshima and Nagasaki during September 1945. Photographs in the "Report by Major Noland Varley, Manhattan District Corps of Engineers on the Physical Damage, Hiroshima, Japan" (Vols. I - III) were taken by members of the MED group including Dr. W. C. Penney. Vol. I consists of a summary of the physical effects of the bomb on structures, meteorology, the population, and public utilities. Graphs and an annotated map are attached. Vols. II and III contain captioned pre- and post-strike aerial and ground photographs with some annotated to refer to specific numbered sites and objects including: the Commercial Museum, Sanwa Bank Building, Chugoku Electric Company, Gogoku Shrine, Business Men's Club, Fukuromachi School, Castle grounds, Fukuya Department Store, Hiroshima Radio Station, City Hall, views taken from the Bank Building, and other structures. also documented in the report are detail photographs of the physical damage to the buildings, bridges, and other structures destroyed and damaged by the atomic blast and fire.	1945			1	https://catalog.archives.gov/id/519719

NARA_0299	Trinity test	Still Photo	374	Record Group 374: Records of the Defense Threat Reduction Agency, 1943 - 2005	374-G	1-9	Photographs Relating to Nuclear Weapons Testing, ca. 1959 - 2005	1945-	This series contains photographs relating to nuclear weapons testing from Trinity (the first nuclear test in 1945) through various types of nuclear tests conducted in the 1990s. Included in this series are photographs from many of the nuclear weapons testing operations, such as Operation Crossroads and Operation Ivy. These images document pre-test preparations, explosions, effects of nuclear weapons, and radiological clean-up at test sites in the U.S. as well as in the Pacific. The majority of the photographs taken in the Pacific document testing on Johnston Island and Eniwetok Atolls. Photographs of U.S. test facilities include Amchitka Island, Alaska; Arnold AFB, Tennessee; Nevada Test Site (NTS); and White Sands Missile Range (WSMR), New Mexico. The majority of the tests document United States nuclear weapons testing; however there are several photographs of France's nuclear weapon test, Licorne, on Mururoa Atoll in 1970. This series also includes views relating to types of nuclear weapons (including Fat Man and Little Boy type bombs), disarmament and non-proliferation, federal defense facilities, and official seals and logos representing the agencies and tests conducted. Subjects related to disarmament and non-proliferation include the Strategic Offensive Arms Elimination (SOAE) Program; Cooperative Threat Reduction (CTR) Program; 1998 Arms Control Conference; and the 1999 Dead Sea tests. In addition, there are views of Senators Sam Nunn and Richard Lugar's trip to the former Soviet Union to implement the Nunn-Lugar Act, and a photograph of President John F. Kennedy signing the Nuclear Test Ban Treaty in 1963 (374-G-13-1). Other personalities in this series include General Roland Lajoie, Deputy Assistant to the Secretary of Defense for Cooperative Threat Reduction (CTR); Dr. Edward Lacey who served as Principal Deputy Director of the Department of Defense On-Site Inspection Agency (OSIA); General Colin Powell; and U.S. Presidents Lyndon B. Johnson and George H. W. Bush.				1	https://catalog.archives.gov/id/1756472

NARA_0304	Trinity test	Still Photo	434	Record Group 434: General Records of the Department of Energy, 1915 - 2007	434-SF	1-38	Photographs of Research Activities of the Department of Energy and Predecessor Agencies, 1945 - 1981	1945-	This series of photographs had its origin in the public affairs office of the Atomic Energy Commission (AEC) in 1947 and was continuously maintained and expanded by the AEC, Energy Research and Development Administration (ERDA), and Department of Energy (DOE) public affairs offices. (A portion of this same central file was accessioned by the Still Picture unit at an earlier date and is available in the Records of the Atomic Energy Commission as Series G.) Record Group 434, Series SF consists of black and white photographic prints, with a few color prints interspersed, organized by an agency-devised subject scheme. The photographs concern all aspects of the science and technology of energy exploitation, including atomic and nuclear bomb tests, peaceful uses of the atom, rare minerals, mining, exploration of fossil fuel reserves, alternative energy sources, and related subjects. NARA_0305	Trinity test	Still Photo	434	Record Group 434: General Records of the Department of Energy, 1915 - 2007	434-OR	1-24	Photographs of Construction, Facilities, and Community Life at Oak Ridge and Other Manhattan Project Sites, 1943 - 1946	1943-1946	The series incorporates some 200 non-Westcott views of contributing facilities outside Oak Ridge-- the aforementioned Hanford and Los Alamos sites; the Argonne National Laboratory in Illinois, site of the nation's first nuclear reactor; the Alabama Ordnance Works; the uranium-producing Uranium Mines in Colorado; the DuPont Dye Works at Carney, New Jersey, and others. The Los Alamos material includes views -- black-and-white along with one color image -- of Trinity test operations, atomic fireball, and post-test "ground zero." (Notebook 40). Additionally, there are some 150 prints, from Corps of Engineers, Army Signal Corps, U.S. Strategic Bombing Survey, and other sources, documenting the immediate impact of the bombs that Oak Ridge helped to build -- destroyed buildings, landscapes of ruin, and radiation victims at Hiroshima and Nagasaki (Box 70). Accompanying these prints is a copy of a Corps of Engineers publication, Photographs of the Atomic Bombings of Hiroshima and Nagasaki, presenting some of the same images plus related items. NARA_0306	Atomic Bomb Report	Still Photo	374	Record Group 374: Records of the Defense Threat Reduction Agency, 1943 - 2005	374-ANT	1-3	Photographs of Atmospheric Nuclear Testing at Pacific Island and Nevada Test Sites, 1946 - 1962	1946-	The Defense Nuclear Agency (DNA), an agency in the Department of Defense, traces its history to the Manhattan Project, which was formed in 1942 to oversee the development of the atomic bomb. In the Atomic Energy Act of 1946, the Manhattan Project was dissolved and its military staff transferred to the newly-established Armed Force Special Weapons Project was redesignated the Defense Atomic Support Agency in 1958 and then the Defense Nuclear Agency in 1971. DNA is responsible for ensuring the safety and security of the United States and of American military forces in the event of nuclear warfare. To accomplish its goal, the Agency conducts field and simulated tests to assess and to enhance the ability of human and animal life, electronic equipment and machinery, and buildings and other structures to withstand the immediate and longterm effects of nuclear explosions. The Agency also manages the Department of Defense nuclear weapons stockpile and its associated report system, conducts nuclear surety inspections, and is prepared to provide emergency response support in the event of a nuclear weapons accident or incident. In addition, it provides advice and assistance to the Chairman of the Joint Chiefs of Staff and the Military Departments on all nuclear matters, including site security, tactics, vulnerability, and radiation effects. The photographs in this series are copies of originals still retained by the DNA, DOD Nuclear Information Analysis Center (DASIAC). While most of the original photographs were taken by photographers hired by the Defense Nuclear Agency, some were acquired from other government agencies or branches of the military which participated or had an interest in nuclear testing. A small number of the photographs in this series were copied from originals already deposited in the Still Pictures Branch of the National Archives. Finally, researchers should note that a large number of photographs relating to the nuclear testing program are still classified and therefore remain in agency custody. This series consists of black-and-white and color photographs of above-ground nuclear testing at Pacific island and Nevada test sites primarily from 1946 to 1958, the year in which the Soviet Union and the United States agreed to a moratorium on the testing of atomic and hydrogen warheads. The Pacific island test and observation sites included in this series are Bikini and Eniwetok atolls, Christmas Island, Johnston Island, and Maui, HI. There are also a few photographs documenting Operation DOMINIC and Events LITTLE FELLER and SEDAN in 1962. Other operations documented are Operation CROSSROADS, SANDSTONE, GREENHOUSE, IVY, CASTLE, REDWING, HARDTACK, TUMBLER/SNAPPER, UPSHOT/KNOTHOLE, WIGWAM, PLUMBBOB, DANNY BOY, and BUSTER/JANGLE. The photographs for each operation are divided into two main subject areas. First, they depict the detonation of aerial, underwater, or				1	1		この資料は戦後の核実験に関するもので、すべてデジタル化されたと記載されている。右記のサイトの中には、"Search within this series"という文字が掲載されており、そこをクリックすると、さらなる資料情報が出てくる。掲載情報を100個で一度に見れるように設定すると、32のファイル情報とともに、各ファイルの中にある、写真がデジタルで見ることができる。32個のファイル数と各ファイルにある個々の写真の1036枚で合計1068点の情報がサイトから見る事ができる。

									surface bombs, presumably as a means to compare the size, shape, and immediate effects of bombs launched under varying circumstances. Second, they illustrate test activities, that is, the preparations—the machinery and equipment used, personnel assembled, buildings constructed, and precautionary measures taken—for each test. The photographs also illustrate the impact which nuclear blasts had both on the landscape of the test site and on the buildings, bridges, and railroads specifically designed and built for the tests. Of particular interest are photographs showing the fleet assembled for Operation Crossroads, the first post-World War II test, and the structural damage to the ships following detonation. For other photographs in the National Archives relating to this series, see Record Group 374, Series OS, Record Group 80, Series G, Record Group 428, Series GX, and Record Group 111, Series SG. There are also several series in Record Group 74, Records of the Bureau of Ordnance, which show the effects of Operation Crossroads on naval equipment and structures.

NARA_0352	Effects of the Atomic Bombs at Hiroshima and Nagasaki	Still Photo	304	Record Group 304: Records of the Office of Civil and Defense Mobilization, 1947 - 1962	304-NT	1-7	Photographs of Nuclear Tests, 1952 - 1958	1952-1958	<p>Most of the records in this series were created by the FCDA, though there is a small number of records created by its successors, including OODM and FEMA. This series consists of images of special nuclear tests, known as operations, including Operations IVY (1952), DOORSTEP (1953), CUE (1955), REDWING (1956), and PLUMBOB (1957). Operation IVY was conducted by Joint Task Force 132 for the Atomic Energy Commission and the Department of Defense, at the Pacific Islands Testing Ground in the Marshall Islands in the fall of 1952. This experimental Hydrogen bomb detonation, code named "MIKE", completely destroyed Eitugelab, the island chosen as the test site.</p> <p>Operation DOORSTEP was conducted at the Yucca Flats, Nevada test site on March 17, 1953. This test was the first one at which civil defense observers were allowed to witness a test program. It was named DOORSTEP to dramatize to the American public what might be expected to happen if an atomic blast took place on the doorsteps of an American city. The FCDA conducted some limited tests in three areas: 1) the effect of a blast on two typical American styles of homes; 2) a test of the strength of 8 typical outdoor home type bomb shelters; and 3) a test of the exposure of typical vehicles to determine the amount of protection provided, and the mechanical operation of the vehicles after the blasts. For additional detail, see the FCDA produced publication at the end of the photographs for this test.</p> <p>For information on Operation CUE, see the description for 304-OC. Operation REDWING, was the first airborne test of an H-bomb, and was conducted at Bikini Atoll, Pacific Islands Testing Ground, on May 21, 1956. Operation PLUMBOB consisted of 24 (each assigned different codenames such as "Kepler", "JOHN", "GALLIE", etc.) separate tests of atomic weapons conducted during the summer of 1957 at the Yucca Flats, Nevada testing ground.</p> <p>The images include before and after scenes of interiors and exteriors of houses, automobiles, and fallout shelters to demonstrate the effects of nuclear explosions. In addition, there are photographs of mannequins, which demonstrated the degree of harm an explosion caused to individuals. Many of the images in this series show the fireball and cloud caused by the nuclear blasts. In folder 1, marked Misc.- Atom Bomb, there are a number of views of unidentified early atomic blasts, as well as views of the first test of the atomic bomb which was conducted at the Los Alamos site on July 16, 1945. Also in this folder are images of the Baker Day explosion at Bikini Atoll on February 2, 1946. In folder two, there are many views of the destruction caused by the bomb blasts at Hiroshima and Nagasaki, Japan.</p>				1	ネガとプリント。	https://catalog.archives.gov/id/541783
NARA_0353	Atomic Bomb in Nagasaki	Still Photo	434	Record Group 434: General Records of the Department of Energy, 1915 - 2007	434-S	1-21	Photographs of Energy Related Subjects, 1965 - 1980	1965-1972	<p>The Department of Energy (DOE) was established effective October 1, 1977 pursuant to executive order 12009 of September 13, 1977. This act consolidated the major Federal Energy functions into one cabinet-level Department, transferring to DOE all the responsibilities of the Energy Research and Development Administration, the Federal Energy Administration, the Federal Power Commission, and the Alaska, Bonneville, Southeastern, and Southwestern Power Administrations, formerly components of the Department of Interior as well as the power-marketing functions of the Department of Interior's Bureau of Reclamation. Also transferred to DOE were certain functions of the Interstate Commerce Commission and the Departments of Commerce, Housing and Urban Development, the Navy, and Interior. Photographs in this series were accumulated by DOE predecessors and maintained by the DOE Public Affairs Staff since the inception of DOE in 1977 and also include images taken by the Atomic Energy Commission (AEC), the Energy Research and Development Agency (ERDA). The photographs were taken at the Oak Ridge National Laboratories in Tennessee (ORNL), the National Reactor Testing Station in Idaho (NRTS), the Bartlesville Energy Research Center in Oklahoma (BERC), the Pittsburgh Energy Research Center (PERC), the Duane Arnold Energy Center in Iowa, and many other energy centers and power stations. The series depicts subjects related to energy and energy use such as nuclear tests, marine biology, environmental studies, irradiated materials, medicine, mining, space activities, drilling for oil including off-shore drilling, gas shortages, solar, geothermal and other alternative energy sources; laser fusion and laser research. Photographs in this series also depict dams, oil tankers, lightning storms, radiation storage containers, power lines and power plants, nuclear stations, construction of nuclear plants, scientific labs, regulatory inspections, contamination monitoring, oil shalefacilities, atomic bomb blasts, bomb damage at Hiroshima and Nagasaki, Japan; scenes in Alaska, and the Alaska pipeline. Notable personalities are former Presidents Gerald Ford and Jimmy Carter. There is along with the original slides a set of reference slides and several folders of slides divided by energy subject titles to be used in the research room.</p>				1		https://catalog.archives.gov/id/558602

NARA_0354	Atomic Bomb in Nagasaki	Still Photo	326	Record Group 326: Records of the Atomic Energy Commission, 1923 - 1978	326-G	1-11	Photographs of AEC Installations, Facilities, Personalities, and Activities, 1947 - 1972	1947-1972	Photographs created or acquired by the AEC's Office of Public Affairs documenting activities, interest, facilities and personnel of the agency. Included are views of particle accelerators, construction of facilities in Los Alamos, New Mexico; Richland, Washington and Oak Ridge, Tennessee. There are views showing investigations and research concerning nuclear medicine, extraction of gasoline from coal, of AEC security officers, horse patrols and their training activities; of bomb damage at Nagasaki and Hiroshima, Japan; and photographs taken at NASA sites of experiments and research related to the space program in 1969. Notable personalities are Samuel M. Nabrit, an AEC Commissioner and Presidents John Kennedy and Lyndon Johnson. Photographs of miscellaneous subjects concerning nuclear energy. Some are in color.				1		https://catalog.archives.gov/id/542137

Truman_0001	Atomic Bomb	Subject Files 1957-1996, Atomic Bomb Collection 1939-1996				The Atomic Bomb Collection consists of various types of documents pertaining to the atomic bomb. Included are: eyewitness accounts; atomic bomb test and test site information; correspondence between Harry S. Truman, Leo Szilard, Franklin D. Roosevelt, Albert Einstein, and others; memorabilia; printed materials; and research papers. This collection is a combination of documents from various donors, "Miscellaneous Historical Documents Collection (MHDC), 1544-2009" (ARC Identifier 1201) and the "General Historical Documents Collection (GHDC), 1775-2009."				1	トルーマン大統領のコレクションには、サブジェクト毎のシリーズがあり、その中には、Atomic Bomb Collectionという名でまとまっているものがあり、この中には33個の資料ファイルが存在している。実際に見てみないとわからないし、気象関係情報が入っているということは考えにくいと思われるが、とりあえず、関連するかもしれないと思われるものを以下に入れた。	https://catalog.archives.gov/id/2662815
Truman_0002	Atomic Bomb	Subject Files 1957-1996, Atomic Bomb Collection 1939-1996	1-2	Subject Files, 1957 - 1996		This series contains information on "Bockscar," the airplane that dropped the atomic bomb on Nagasaki; eyewitness descriptions of the bombing of Pearl Harbor and atomic tests at Eniwetok; other eyewitness accounts; drawings of McDonald Ranch at Trinity Site, Alamogordo, New Mexico; other information regarding atomic tests; correspondence between Harry S. Truman, Leo Szilard, Franklin D. Roosevelt, George C. Marshall, Albert Einstein, General Leslie Groves, Carl Hatch, Henry Stimson, and others; copies of leaflets dropped on Japanese cities in conjunction with the atomic bomb; minutes of a meeting held at the White House to discuss war strategy on June 18, 1945; photocopies of photographs; various research papers; documents from Yale University pertaining to the atomic bomb; and memorabilia.				1	Restricted - Possibly	https://catalog.archives.gov/id/2662816
