

Appended Table 1
The draft of Table 2(additives)

- "Serial No." consists of numbers already used in the current Positive List and numbers assigned for convenience to invite opinions (April to July 2022).
- At the promulgation of the new Positive List, new serial numbers will be assigned to the substances and the old ones will be shown as reference information.

Serial No.	substance name	the value of use limit (%)						requirements
		Polymer Group 1	Polymer Group 2	Polymer Group 3	Polymer Group 4	Polymer Group 5 (heat resistant temperature: $\geq 150^{\circ}\text{C}$)	Polymer Group 5 (heat resistant temperature: $< 150^{\circ}\text{C}$)

Notes

Symbols used in the columns under "Use limit (%)" mean as follows:

(1) The symbol "-" means that the substance cannot be used in the base polymers categorized as the corresponding Polymer Group in Table 1.

(2) The symbol "*" means the amount set on the company's own responsibility, when designing a synthetic resin, as the minimum amount that can exhibit the desired characteristics to the base polymers categorized as the corresponding Polymer Group in Table 1.
