

## Schedule 6

| Number of Packages per Lot (N) | Number of Packages Opened for Sampling (n) | Quantity of Collected Specimens (kg) | Number of Specimens |
|--------------------------------|--|--------------------------------------|---------------------|
| ≤ 15                           | 2  | 1                                    | 1                   |
| 16 ~ 25                        | 3  | 1                                    | 1                   |
| 26 ~ 90                        | 5  | 1                                    | 1                   |
| 91 ~ 150                       | 8  | 1                                    | 1                   |
| 151 ~ 280                      | 13   | 1                                    | 1                   |
| 281 ~ 500                      | 20   | 1                                    | 1                   |
| 501 ~ 1,200                    | 32   | 1                                    | 1                   |
| 1,201 ~ 3,200                  | 50   | 1                                    | 1                   |
| 3,201 ~ 10,000                 | 80   | 1                                    | 1                   |
| 10,001 ~ 35,000                | 125  | 1                                    | 1                   |
| 35,001 ~ 150,000               | 200  | 1                                    | 1                   |
| 150,001 ~ 500,000              | 315  | 1                                    | 1                   |
| ≥ 500,001                      | 500  | 1                                    | 1                   |

\* For collecting specimens of products in bulk cargo such as grains, beans, follow the procedures below:

A. Specimen collection upon loading onto-silo, etc.

When loading onto a silo, select a single arbitrary silo, etc. as one lot. Use means such as autosamplers to collect specimens that are representative of the entire lot. Collect a total of 10 kg or more of the specimen in 15 collections over appropriate intervals. Then mix all specimens together and divide them up to obtain 1 specimen (of 1 kg or more).

B. Specimen collection on a barge

Collect a total of 10 kg or more of the specimen from a total of 15 positions in the upper, middle and lower parts of an arbitrary barge. Then mix all specimens together and divide them up to obtain 1 specimen (1 kg or more).

C. Specimen collection from a container

Collect a total of 10 kg or more of the specimen from a total of 15 positions in the upper, middle and lower parts of an arbitrary container. Then mix all specimens together and divide them up to obtain 1 specimen (1 kg or more).
