* For collecting specimens of products in bulk cargo such as grains, beans, follow the procedures below:

A. Specimen collection upon loading onto-silo, etc.

When loading onto a silo, select a single arbitrary silo, etc. as one lot. Use means such as autosamplers to collect specimens that are representative of the entire lot. Collect a total of 10 kg or more of the specimen in 15 collections over appropriate intervals. Then mix all specimens together and divide them up to obtain 1 specimen (of 1 kg or more).

B. Specimen collection on a barge

Collect a total of 10 kg or more of the specimen from a total of 15 positions in the upper, middle and lower parts of an arbitrary barge. Then mix all specimens together and divide them up to obtain 1 specimen (1 kg or more).

C. Specimen collection from a container

Collect a total of 10 kg or more of the specimen from a total of 15 positions in the upper, middle and lower parts of an arbitrary container. Then mix all specimens together and divide them up to obtain 1 specimen (1 kg or more).
