

Schedule 1

Food Groups	Inspected Substances *1	Number of Inspection Specimens	Total Number of Inspection Specimens
Livestock Foods Beef, pork, chicken, horse meat, other poultry meat, etc.	Antibacterial substances, etc.	2,148	5,995
	Residual agricultural chemicals	2,148	
	Additives	238	
	Pathogenic microbes	717	
	Standards, etc.	715	
	Radiation irradiation	29	
Processed Livestock Foods Natural cheese, meat products, ice cream, frozen food (meat), etc.	Antibacterial substances, etc.	1,846	9,410
	Residual agricultural chemicals	1,097	
	Additives	1,127	
	Pathogenic microbes	3,703	
	Standards, etc.	1,637	
Fishery Foods Bivalves, fish, crustacea (shrimps, crabs), etc.	Antibacterial substances, etc.	1,728	5,214
	Residual agricultural chemicals	1,428	
	Additives	297	
	Pathogenic microbes	1,194	
	Standards, etc.	444	
	Genetically modified food	59	
	Radiation irradiation	64	
Processed Aquatic Foods Processed fish products (fillet, dried or minced fish, etc.), frozen food (marine animals, fish), processed fish egg products, etc.	Antibacterial substances, etc.	3,065	15,717
	Residual agricultural chemicals	2,853	
	Additives	1,444	
	Pathogenic microbes	4,418	
	Standards, etc.	3,937	
Agricultural Foods Vegetables, fruit, wheat, corn, beans, peanuts, nuts, seeds, etc.	Antibacterial substances, etc.	3,398	19,713
	Residual agricultural chemicals	10,387	
	Additives	743	
	Pathogenic microbes	2,032	
	Standards, etc.	235	
	Mycotoxins	2,416	
	Genetically modified food	383	
	Radiation irradiation	119	
Processed Agricultural Foods Frozen foods (processed vegetables), processed vegetable products, processed fruit products, spices, instant noodles, etc.	Antibacterial substances, etc.	717	22,314
	Residual agricultural chemicals	6,290	
	Additives	3,533	
	Pathogenic microbes	2,988	
	Standards, etc.	3,218	
	Mycotoxins	4,600	
	Genetically modified food	510	
	Radiation irradiation	458	
Other foods Health foods, soups, seasonings, confectionary, cooking oil and fat, frozen food, etc.	Residual agricultural chemicals	775	8,186
	Additives	4,421	
	Standards, etc.	1,196	
	Mycotoxins	1,794	
Beverages Mineral water, soft drinks, alcoholic beverages, etc.	Residual agricultural chemicals	418	2,327
	Additives	1,045	
	Standards, etc.	746	
	Mycotoxins	118	
Additives Apparatus, containers and packages, Toys for infants	Specifications, etc.	1,462	1,462
Foods subject to enhanced inspection*2	Antibacterial substances, etc., residual agricultural chemicals, additives, pathogenic microbes, standards, etc., mycotoxins, genetically modified food, radiation irradiation, removal of SRMs	10,000	10,000
Grand Total (gross)			100,338

*1: Examples of inspected Substances

- Antibacterial substances, etc. : Antibiotics, synthetic antimicrobials, hormone agents, etc.
- Residual agricultural chemicals : Organophosphorus, organochlorines, carbamates, pyrethroid agricultural chemical, etc.
- Additives : Preservatives, coloring agents, sweeteners, antioxidants, fungicides, etc.
- Pathogenic microbes : Enterohemorrhagic *Escherichia coli* (*E. coli*) O26, O103, O104, O111, O121, O145 and O157, *Listeria monocytogenes* etc.
- Standards, etc. : Items stipulated in the standards (bacterial count, coliform bacteria, radioactive substances, etc. (excluding pathogenic microbes)), shellfish poisons (diarrheic shellfish and paralytic shellfish poisons), etc.
- Mycotoxins : Aflatoxin, deoxynivalenol, patulin, etc.
- Genetically modified foods : Genetically modified foods etc. that have not been assessed for safety
- Radiation irradiation : Whether irradiation is applied

*2: Additional inspections to be conducted during the implementation of the Imported Foods Monitoring and Guidance Plan for FY 2026, based on the occurrence of violations and overseas information at the time of importation.
