

Points of regulation difference between domestic agencies and overseas agencies

- In terms of registration requirements and obligation of inspections and examinations, among others, the same points as for those of domestic inspection and verification agencies are imposed.
- A request to conform will be issued when registration requirements are not met and a request to improve will be issued when there is a breach of obligation for inspections and examinations.
- Registration will be revoked when requests and/or on-site inspections, etc. are rejected.

* Similar regulations to the Electrical Appliances and Materials Safety Act and the Ship Safety Law, etc. where overseas inspection agencies are systematically allowed
