

Sum up of radionuclide test results reported in FY2023  
(Up-to-date Report as of 31 March 2024)

- Food products and wild harvests are monitored by prefectural governments based on the Japanese maximum levels of radio-cesium set by the Ministry of Health, Labour and Welfare.
- The monitoring plans are annually revised, focusing on the items with higher concentration.
- Monitoring of radionuclides in food are mainly carried out before shipment.
- Most of the data exceeding the levels are derived from areas where restrictions of distribution have been instructed.

• Appropriate measures are taken for individual pre-sales / recall cases. The items are disposed of and shipments are suspended based on Food Sanitation Act.

\*This case was attributed to cross-contamination from an appliance used for preparation during post-harvest.

Origin (Prefecture)	Kinds of products/harvests†	Total number of samples	Number of exceeding samples	Items exceeding Japanese maximum levels (JMLs)	
				Under area-based control	Pre-sales / recall case
Fukushima	Agricultural products	5,972	1		Buckwheat (1)*
