## Main items with regulation - revision, etc

Out-patient management addition	→	Provide explanation to patients (*) and take measures to removing anxiety and questions from patients, and establish a standard of time for them. * Explain important points during treatment, etc, while reconfirming symptoms with patients.
7-to-1 hospitalization basic fee	→	Establish a standard by "nursing necessity" and also execute subtraction when the number of doctors does not reach a certain number.
Out-patient psychotherapy	→	For out-patient psychotherapy, calculate only when the time used for examination is more than 5 minutes.
Promotion of generic drug utilization	→	Take necessary measures (*) to promote generic drug utilization. * 1. Change in prescription form, 2. Assessment of pharmacies with more than 30% of preparation of generic drug, 3. Enabling divisible dispensation for "trial"
Revision of Treatment	→	Include minor treatments in basic treatment fees. (*) * Treatments that can be operated if there are examination by doctors and appropriate guidance, patients themselves or families, and that do not necessarily require advanced techniques from medical professionals such as doctors, etc
Contact lenses	→	For examination fee for contact lenses, further regulation is conducted since there were many cases of inappropriate medical fee claims.
