

Community Care

- We want the elderly to continue to live healthily and “in their own ways” in their home towns to the end of their lives. To this end, staff in medical care, long-term care, and welfare work together to provide various professional outpatient and home-visit services under the corporate philosophy that, “elderly have tomorrow just like us.” We have a system to provide them with complete support by admitting them to our Kasumigaseki South Hospital, appropriate facilities in the hospital group or other referral affiliate institutions, etc. in a speedily and proper manner.

◆ Home-visit services ◆

Our staff visit homes users live in to provide services

- Home-visit medical care 【The average number of users per month: 230】

If it is difficult for patients to visit hospitals, doctors visit them in home, to provide medical care, treatment, etc., based on diseases and conditions, as well as advice on everyday life.
