SANITARY INFORMATION

- The animal shows no clinical signs of rabies or tularemia at the time of shipment.
- Meeting any of the following conditions:

Rabies:

- The animal has been kept for the past 6 months, or since birth or capture in a region that the Minister of Health Labor and Welfare of Japan has designated as one where rabies has not been reported.
- The animal has been kept for 12 months or since birth in a storage establishment where rabies has not been reported for the past 12 months in a non-designated region.
- The animal has been kept for the past 6 months or since birth in a quarantine establishment in a non-designated region.
- The animal is confirmed to have met either conditions 2 or 3 when imported from a non-designated region, and has been kept in a designated region since then.

Tularemia

- The animal has been kept for the past 12 months or since birth in a storage establishment where tularemia has not been reported for the past 12 months.
- The animal has been disinfected for Ixodes (ticks).
- The animal has been kept for the past 15 days or since birth in a quarantine establishment.

I, the undersigned, certify that the animal described above meets the requirements.
