III Attestation

I, the undersigned Official Veterinarian do hereby certify that:

- 1) Notifiable Avian Influenza (NAI) and Newcastle Disease are notifiable diseases in Finland. These diseases must be brought to the attention of the competent authority of Finland immediately after an outbreak is detected or suspected in accordance with national regulation;
- 2) the surveillance program for NAI based on the OIE Code is implemented by the competent authority of Finland;
- 3) the vaccination against NAI is prohibited in Finland;
- 4) Finland has been free from NAI for at least 90 days before the day of shipment of poultry meat and meat products to be exported to Japan;
- 5) the poultry used for the production of poultry meat and meat products to be exported to Japan must be kept and raised in an area (at least in the radius of 50 km from the premises of origin) where there has been free from Newcastle Disease for at least 90 days before slaughter or since the hatching of the poultry;
- 6) the premises of origin of the poultry, from which the exported poultry meat and meat products originates, have been free from Fowl Cholera and other serious/important poultry infectious diseases designated by the competent authority of Finland for at least 90 days before slaughter or since the hatching of the poultry;
- 7) the establishments for production (including slaughtering, processing and storage facilities. Hereinafter referred to as "the establishments") of the poultry meat and meat products to be exported to Japan must be authorized by the competent authority of Finland as the ones where sanitary inspections are conducted periodically by the government veterinary inspector or the animal health inspector appointed by the competent authority of Finland (hereinafter referred to as "the inspector");
- 8) the poultry used for the production of poultry meat and meat products to be exported to Japan must be confirmed free from any poultry infectious diseases as a consequence of ante- and post-mortem inspections conducted by the inspector;
- 9) the poultry meat and meat products to be exported to Japan must be handled and stored in such a way as to prevent contamination with pathogens of any animal infectious disease prior to shipment to Japan; and
- 10) the poultry meat or meat products described here in were slaughtered, cut and processed under sanitary conditions in accordance with laws and regulations of Finland, which are at least equivalent to laws and regulations of Japan.
