INFORMATION

Showcasing Japan's traditional and high-tech products and manufacturing skills

Japan boasts both traditional techniques that have been refined through history and state-of-the-art skills that are even ahead of advanced technology. Japan Skills Village showcases a variety of these products and skills which are the pride of the nation. The Village is composed of eight areas, including a section for Shizuoka, the host of the International Skills Festival for All, Japan 2007. Each area presents a full range of well-crafted exhibitions and demonstrations based on a theme. Come see and touch the products of the manufacturing nation of Japan and witness demonstrations of the manufacturing skills used to produce them. Their special appeal is sure to win you over!

アニメーター Animator

This Festival's presentation skill. Aiming to promote animation as a future international competitive event, this feature introduces the profession of animator through an exhibition and a hands-on corner.

Hiraku 拓

Skills and techniques will play a major role in the creation of a society where people with disabilities and older persons can also live with peace of mind. This area displays products that support the lifestyles of these members of society and showcases the value of a skill to do our life comfortably.

美 Bi

Using its rich sensitivities and outstanding techniques, Japan has also created exceptional products for the glamorous world of beauty, and our products are well received both in Japan and overseas. Although the world of fashion is swayed by the trends of the times, these products and skills never go out of style. This exhibition area features displays of Japan's superior products and demonstrations of beauty skills.

和 Nagomi

Japan's beautiful and abundant natural environment has fostered profound sensibilities in the Japanese people and has also inspired Japan's rich tradition of manufacturing. This area showcases outstanding examples of "Japanese skills" & "art of harmony" that give richness to Japanese lifestyle.

Tsudoi 集

The exhibition area entitled "Gathering Place" is based on the theme of comfort and features demonstrations of various skills related to our everyday lives. Here you can watch technicians at work and learn the joy of manufacturing.

Yume 夢

Engineers and technicians constantly strive to create new things. Thanks to them, our everyday dreams and daydreams have again and again been made into reality. This exhibition area features a display of state-of-the-art products that are indispensable for society's advancement and demonstrations of the outstanding manufacturing skills used to create them.

Omomuki

Manufacturing skills do not just bring us industrial products and daily goods; they fill our lives with charm and they even empower the creation of new culture at times. Through the exhibition of creative works, this area will highlight the appeal and infinite possibilities found in manufacturing.

趣

Welcome to Shizuoka to 静岡

Shizuoka Prefecture, the Festival's host, is one of Japan's top manufacturing centers. This exhibition area features the prefecture's traditional products whose manufacturing techniques have been handed down from generation to generation since 1600. There are also displays of products created using the outstanding manufacturing technologies of the corporations in the prefecture.
