

肝移植後のHCV RNAの推移 (Sreekumar, Hepatology, 2000)

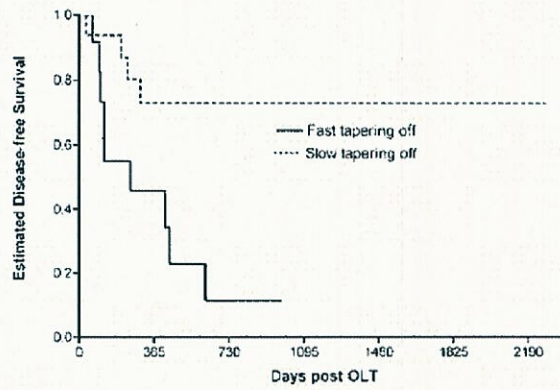

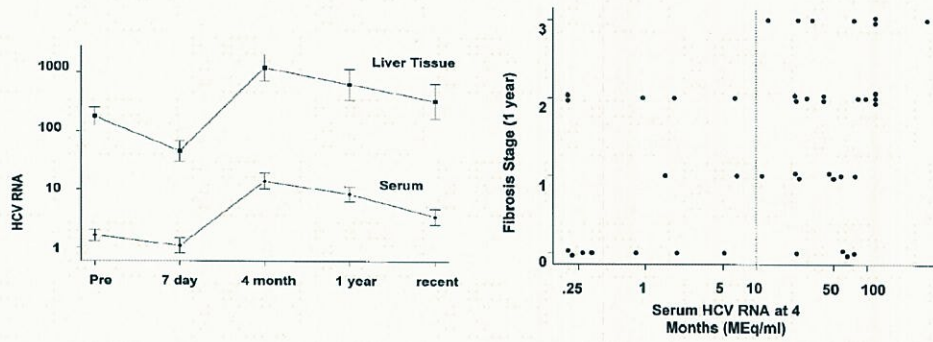

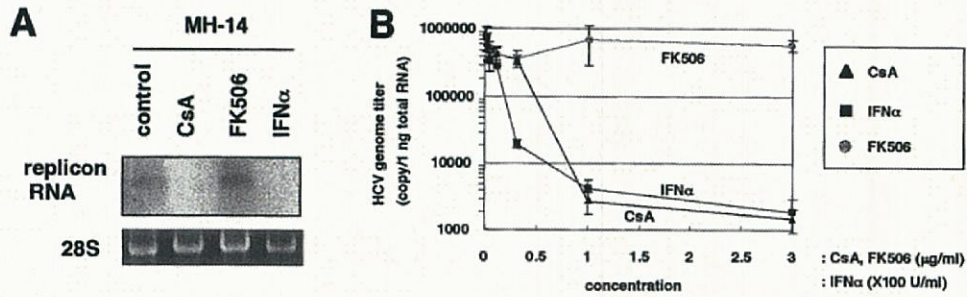

Figure 1. Estimated disease-free survival after liver transplantation in patients with recurrent hepatitis C, according to fast or slow way of tapering off steroids (disease = moderate or severe chronic hepatitis, $P = .02$ by log rank test). (*Liver Transpl* 2002;8:884-888.)

シクロスポリンによるHCV増殖抑制効果

(HEPATOLOGY 2003;38:1282-1288.)

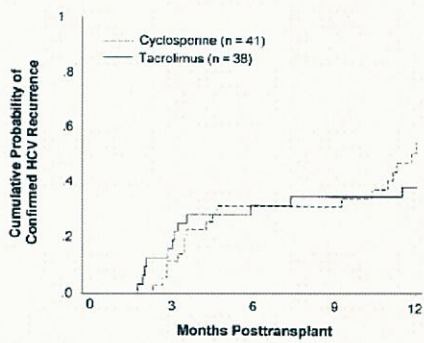

Figure 1. Kaplan-Meier plot for time to HCV recurrence confirmed by biopsy. Log-rank comparison of treatment groups, $P = .19$.

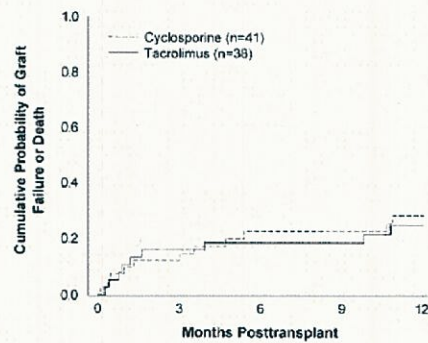

Figure 3. Kaplan-Meier plot for time to graft failure or death. Log-rank comparison of treatment groups, $P = .789$.

(Liver Transpl 2004;10:1258-1262.)
