ユニバーサルアクセスに向けた国家目標の設定

Japan's national targets that were set for 2010 through.
an inclusive and transparent process are as follows:

-To double the number of people using voluntary HIV testing services from about 100,000 in 2005 to 200,000 by 2010.

(保健所等のHIV抗体検査件数を 2005 年の約 10 万件から 2010 年には 2 倍の 20 万件にする。)

-To decrease the number of the newly reported cases of AIDS approximately by 25% from 367 cases in 2005 to 275 cases by 2010.

(エイズ患者の新規報告数を 2005 年の 367 件から 2010 年には 25% 減少させる。)
