

Outline of Long-Term Care Insurance System

Overview

Long-Term Care Insurance System Diagram

Detailed Information 1 Persons covered / eligible persons / premium burden / levy / collection methods

	Primary insured Persons	Secondary insured Persons
Covered	Persons aged 65 or older	Persons aged 40-64 who are participants of medical insurance
Eligible	- Persons requiring long-term care (for being bedridden, dementia, etc.) - Persons requiring support (for daily activities)	The case is limited where a condition of need for Long-Term Care or for a Needed Support Condition is due to disease (specified disease) caused by aging such as terminal cancer and rheumatoid arthritis, etc.
Premium burden	Collected by municipalities	Medical insurers collect the premiums as medical insurance premiums and pay in lump-sum
Levy and collection methods	- Fixed premium in accordance with income level (to ease the burden on the people with low income) - Special collection (deduction from the pension) for the insured receiving ¥180,000 or more pension benefits annually. For others, ordinary collection.	- Health care insurance: "standard remuneration and standard bonus" x "rate of long-term care insurance premium" (borne partly by business operators) - National Health Insurance: Divided proportionally by income or on a per capita basis (borne partly by the National Treasury)

Detailed Information 2 Premiums

1. In order to require the burden bearing according to the ability to bear for the premium of the primary insured persons, a fixed premium amount is set by each municipality in accordance with the income level of the insured. The burden of the people with low income is eased, while the burden of the people with high income is incurred according to the income of the insured persons.

Level	Eligible persons	Premium	(Reference) Target persons (FY 2020)
Level 1	- Public assistance recipients - Recipients of the old-age welfare pension in households exempt from municipal tax - Persons in households exempt from municipal tax with a pension income, etc. of 800 thousand yen or less	Standard amount x 0.5	6.09 million
Level 2	Persons in households exempt from municipal tax with a pension income, etc. of more than ¥800,000 but ¥1.2 million less	Standard amount x 0.75	2.96 million
Level 3	Persons in households exempt from municipal tax with a pension income, etc. of more than ¥1.2 million	Standard amount x 0.75	2.71 million
Level 4	Persons exempt from municipal tax with a pension income, etc. of ¥800,000 or less who have a member paying municipal tax in the same household	Standard amount x 0.9	4.46 million
Level 5	Persons exempt from municipal tax with a pension income, etc. of more than ¥800,000 who have a member paying municipal tax in the same household	Standard amount x 1.0	4.80 million
Level 6	Persons subject to municipal tax with a total income of less than ¥1.2 million	Standard amount x 1.2	5.21 million
Level 7	Persons subject to municipal tax with a total income of ¥1.2 million or more but less than ¥2.1 million	Standard amount x 1.3	4.63 million
Level 8	Persons subject to municipal tax with a total income of ¥2.1 million or more but less than ¥3.2 million	Standard amount x 1.5	2.38 million
Level 9	Persons subject to municipal tax with a total income of ¥3.2 million or more	Standard amount x 1.7	2.55 million

* The table above shows standard levels of premiums. Regarding taxable group, Municipalities can flexibly set the number of levels by Municipal Ordinance. In the meantime, municipalities can set the factors to be multiplied by the standard amount of the premiums for each level.

* Due to the introduction of public funding, measures have been strengthened to reduce the insurance premiums within the range of the standard cost x 0.05 for the first phase since April in 2015, and furthermore x 0.15 for the first phase, x 0.25 for the second phase, and x 0.05 for the third phase since October in 2019.

2. In case of secondary insured persons, the premium is calculated based on the calculation standard of the medical insurance system that they subscribe.

Detailed Information 3 User Expenses

1. Fixed burden of 10%/20%/30% of the service cost, in addition to residence/meal costs are basically borne by the persons hospitalized or the persons staying at facilities.
2. In the case where the 10%/20%/30% burden bearing accounts for a large amount, high-cost long-term (preventive) care service benefits will be paid
3. Special care shall be paid to people with low income regarding 10% burden bearing and residence/meal cost burdens

* 20% burden bearing accounts: an income of over ¥1.6 million and an income of over ¥3.46 million combined with a primary insured person's income and others' income within the same household (an income of over ¥2.8 million in case a primary insured person is only one within the same household)

30% burden bearing accounts: an income of over ¥2.2 million and an income of over ¥4.63million combined with a primary insured person's income and others' income within the same household (an income of over ¥3.4 million in case a primary insured person is only one within the same household)

<High-cost long-term care service benefits>

Income level	Ceiling amount for household
(1) Cases in which, (2) or (3) does not apply. [1] Households subject to municipal tax — taxable income of less than ¥3.8 million (annual income of approximately ¥7.7 million) [2] Taxable income of ¥3.8 million (annual income of about ¥7.7 million) or more — taxable income of less than ¥6.9 million (annual income of about ¥11.6 million) [3] Taxable income of ¥6.9 million (annual income of about ¥11.6 million) or more	[1] ¥44,400 [2] ¥93,000 [3] ¥140,100
(2) [1] Those in municipal-tax exempted household [2] In case reduction to ¥24,600 does not make them ineligible for public assistance	[1] ¥24,600 [2] ¥24,600
(a) Those with total income including the pension income of ¥800,000 or less in the municipal-tax exempted household	Individual ¥15,000
(b) Recipients of Old-age Welfare Pension in the municipal-tax exempted household	Individual ¥15,000
(3) [1] Recipients of public assistance [2] In case reduction to ¥15,000 does not make them ineligible for public assistance	[1] Individual ¥15,000 [2] ¥15,000

* Figures indicated as individual represent the ceiling amount for individuals in the households

* For those in special nursing home for the elderly (subjects for measures in the old system) at the time of enforcement of the system, reduction and exemption measures according to their income level are taken for the time being.

Detailed Information 4 Procedures for Using the System

1. The Certification Committee for Long-term Care Need is responsible for the evaluation and judgement based on investigation results of the insured's mental and physical conditions and on primary care physician' letters of opinions (evaluation and judgement can be entrusted to prefectures)
Municipalities are responsible for certification of Long-term Care and Support Needs based on the evaluation results by the Certification Committee for Long-term Care Need

* The criteria for Long-term Care Need Certification are nationally uniform and established objectively.

→ Benefits are capped according to the levels of Long-term Care Need

- Benefit limits for in-home care services are approximately ¥50,000 to ¥362,000 per month (subject to regions). They vary based on the levels of Long-term Care Need (7 levels including the levels of Support Need).

(Benefit limits for in-home services)

Level of Long-term Care Need	Benefit limits
Support level 1	5,032 units/month
Support level 2	10,531 units/month
Care level 1	16,765 units/month
Care level 2	19,765 units/month
Care level 3	27,048 units/month
Care level 4	30,938 units/month
Care level 5	36,217 units/month

* 1 unit: ¥10 to ¥11.40 (subject to regions and service types)

2. To provide comprehensive and systematic services suitable for the needs of users, it is fundamental to prepare long-term care service plans (care plans).

Detailed Information 5 Contents of Insurance Benefits

	Services provided by comprehensive projects	Services of care prevention benefits	Services of long-term care benefits
Services designated/supervised by prefectures	—	- Preventive long-term care services - Home-visit bathing service for preventive long-term care - Home-visit nursing service for preventive long-term care - Home-visit rehabilitation service for preventive long-term care - Management and guidance for in-home medical service for preventive long-term care - Outpatient rehabilitation service for preventive long-term care - Short-term admission for daily preventive long-term care - Short-term admission for recuperation for preventive long-term care - Daily preventive long-term care admitted to a specified facility - Lending preventive long-term care welfare instruments - Sales of specific preventive long-term care welfare instruments	- In-home Services - Home-visit long-term care - Home-visit bathing long-term care - Home-visit nursing - Home-visit rehabilitation - Guidance for management of in-home medical long-term care - Outpatient Day Long-Term Care - Outpatient rehabilitation - Short-term admission for daily life long-term care - Short-term admission for recuperation - Daily life long-term care admitted to specified facility - Rental service of equipment for long-term care covered by public aid - Sales of specified equipment covered by public aid - Facility services - Home-based care support services - Long-term care health facility - Sanatorium medical facility for the elderly requiring long-term care - Integrated facility for medical and long-term care
Services designated/supervised by municipalities	- Preventive long-term care/life support comprehensive services 1st house-call services 1st day-care services 1st life support services 1st preventive long-term care support services	- Preventive long-term care support services - Community-based preventive long-term care services - Outpatient care service for preventive long-term care for dementia patient - Multifunctional preventive long-term care in a small group home - Daily life care service for preventive long-term care in communal living for dementia patient	- Community-based services - Regular visiting/on demand home-visit long-term/nursing care - Home-visit at night for long-term care - Community-based outpatient day long-term care - Outpatient long-term care for dementia patients - Multifunctional long-term care in a small group home - Communal daily long-term care for dementia patients - Daily life long-term care for elderly in community-based specified facility - Admission to a Community-Based Facility for Preventive Daily Long-Term Care of the Elderly Covered by Public Aid - Combined Multiple Service (multifunctional long-term care in a small group home & home visit nursing)
Others	—	• Home modification	• Home modification

* After partial enforcement of the "Act on Arrangement of Relevant Acts to Promote Reform for Improving Regional Autonomy and Independence", the authority of services designated/supervised by prefectures has been transferred to designated/core cities.

Detailed Information 6 Consideration for Stable System Operation

<Financial consideration>

The Fiscal Stability Funds are established in prefectures (financed by the central government, prefecture, and municipalities evenly by 1/3) to provide grants or loans to supplement financial shortage due to unexpected increase in the amount of benefits and decrease in premium collection.

<Operational consideration>

1. Certification of needed long-term care and support may be entrusted to prefectures.
2. Prefectures support municipalities in joint establishment of the Certification Committee for Long-term Care Need.

Development of Infrastructure for Long-Term Care Insurance

Overview

Development of Infrastructure

1. In order to develop long-term care service infrastructure systematically, municipalities and prefectures formulate the municipal insured long-term care service plans and prefectural insured long-term care service plans respectively in accordance with the basic guidelines formulated by the government.
2. Municipalities take required measures to reflect opinions of the insured at the time of formulating or revising the municipal insured long-term care service plans.
3. The government provides subsidies such as for community nursing care and welfare space development in order to promote disaster prevention measures at nursing care facilities, etc. Furthermore, the government implements support through the Fund for Securing Comprehensive Medical and Long-term Care in the Community established in each prefecture to promote developing community's small-scale service bases for use in daily living area.

Detailed Information 1

Subsidy for community long-term care and welfare space development, etc.

1. Purpose

In order to promote disaster prevention and mitigation measures for facilities for the elderly, the measures shall be taken such as installation of sprinklers, application of earthquake resistance, and further, installation of emergency private power generation facilities, strengthening of flood control measures, and repair of concrete block walls that may collapse.

2. Contents

- [1] Sprinkler installation support project for existing facilities for the elderly. From April 2015, in principle, it is obligatory to install sprinklers in facilities for the elderly, etc., where many persons who have difficulty evacuating on their own are admitted. In this project, the facilities for which sprinkler installation obligations have arisen from April 2018, shall be promptly improved.
- [2] Repairing support project of facilities for disaster prevention against group homes for the elderly with dementia. In order to ensure the safety and security of users of facilities for the elderly, etc., the earthquake-resistant modification and large-scaled repairs due to aging facilities shall be promoted.
- [3] Disaster Prevention Renovation Support Project for Elderly Facilities by Social Welfare Cooperation Promotion Corporations, etc. In order to ensure the safety and security of users of facilities for the elderly, etc., large-scale renovations due to facility aging shall be promoted.
- [4] Emergency private power generation facilities installation project, flood control measures strengthening projects for facilities for the elderly. Since the persons who need equipment such as respirators, oxygen therapy, and sputum aspiration are admitted to facilities for the elderly and it is expected that their life will be threatened due to a large-scaled power outage, etc., the installation of emergency private power generation equipment shall be promoted. In addition, as part of flood control measures, the installation of vertical evacuation spaces, elevators and slopes, etc. shall be supported to ensure evacuation in facilities for the elderly.
- [5] Safety measures strengthening project, ventilation system installation project. In order to strengthen safety measures of facilities for the elderly, etc., the repair of concrete block walls, etc. that have deterioration or damages, as well as problems in height, buttresses, etc. shall be promoted. Installation of ventilation systems shall also be promoted to prevent infectious diseases.

3. Implementing entities: Prefectures / Municipalities

4. Rate of grant: Fixed amount (1/2 for some projects)

5. Budget: Grants for establishing facilities of community care and welfare space developments, etc. :¥1.17 billion (FY 2023)

Detailed Information 2

Integrated Securing Funds for Regional Medical and Long-term Care (The portion of developing long-term care facilities)

1. Purpose

Toward the establishment of the community-based integrated care system, based on prefectural plans, the government supports the promotion of developing systems which provide long-term care services including community-based services etc., meeting regional specific circumstances.

2. Contents of the projects

By using expenses from grants placed in prefectures, the following services are implemented.

- Services for developing long-term care facilities etc.

To ensure that the elderly continue to live in the community they are familiar with, support is provided as follows: subsidizing the cost for developing community-based long-term service facilities providing and establishments running community-based care service business and the expenses of opening new long-term care facilities, etc.; establishing child-care centers in long-term care facilities and renovating intensive care homes for the elderly to convert multi-resident rooms into private rooms; converting sanatorium medical facilities for the elderly requiring long-term care into integrated facilities for medical and long-term care.

3. Organizations responsible for the operation: prefecture

4. Subsidy ratio: Fixed (1/2 for some projects)

5. Budget: Integrated Securing of Funds for Regional Medical and Long-term Care (the portion of developing long-term care facilities): 35.2 billion (FY 2023)

Implementation Status of Long-Term Care Insurance System

Detailed Data 1 Changes in Number of Primary Insured persons (person)

As of the end of April of each year

2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014

Detailed Data 5 Individual Service Expenses

	Expense (unit: ¥ 1 million)	Percentage (unit: %)
Total	934,055	100.0
Home-based services (including nursing care preventive services)	420,659	45.0
Home-visit/outpatient	313,641	33.6
Home-visit long-term care	90,666	9.7
Home-visit bathing long-term care	4,911	0.5
Home-visit nursing	32,954	3.5
Home-visit rehabilitation	5,434	0.6
Outpatient day long-term care	107,063	11.5
Outpatient rehabilitation	38,865	4.2
Rental of assistive equipment	33,748	3.6
Short-term institutionalization	38,926	4.2
Short-term stay for LTC	35,361	3.8
Short-term admission for recuperation (in long-term care health facilities)	3,423	0.4
Short-term admission for recuperation (in hospitals, etc.)	109	0.0
Short-term admission for recuperation (health care facility)	32	0.0
Guidance for management of in-home medical long-term care	13,410	1.4
LTC for residents of specified institutions (excluding short-term use)	54,624	5.8
LTC for residents of specified institutions (short-term use)	58	0.0
In-home long-term care support	46,809	5.0
Community-based services	161,969	17.3
Periodic or on-call home-visit long-term care and nursing care	6,232	0.7
Home-visit at night for long-term care	315	0.0
Community-based outpatient day long-term care	34,737	3.7
Daycare for LTC of the elderly with dementia	6,565	0.7
Multifunctional LTC in a small group (excluding short-term use)	24,059	2.6
Multifunctional LTC in a small group (for short-term use)	21	0.0
LTC for the elderly with dementia in residential care settings (excluding short-term use)	62,557	6.7
LTC for the elderly with dementia in residential care settings (for short-term use)	41	0.0
Community-based LTC for residents of specified facilities (excluding short-term use)	1,843	0.2
Community-based LTC for residents of specified facilities (short-term use)	1	0.0
Admission to a Community-Based Facility for Preventive Daily Long-Term Care of the Elderly Covered by Public Aid	20,438	2.2
Combined Multiple Service (multifunctional long-term care in a small group home & home visit nursing, excluding short-term use) Combined Multiple	5,151	0.6
Service (multifunctional long-term care in a small group home & home visit nursing, for short-term use)	13	0.0
Service in institutions	304,619	32.6
Services provided in intensive care homes for older adults	169,763	18.2
Long-term care health facility service	114,885	12.3
Sanatorium long-term care service	3,520	0.4
Integrated facility for medical and long-term care service	16,451	1.8

Source: Prepared by the Health and Welfare Bureau for the Elderly, MHLW, based on the "Statistics of Long-term Care Benefit Expenditures" (examined as of April 2022) of Social Statistics Office to the Councilor, Director-General for Statistics, Information System Management and Industrial Relations, MHLW.

- (Note) 1. The figure of individual categories may not add to totals due to rounding
2. The figures include long-term prevention benefit.

Detailed Data 6

Changes in Total Amount of Long-Term Care Expenses (¥100 million/Year)

(Fiscal year)

2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
36,273	45,919	51,929	56,891	62,025	63,957	63,615	66,719	69,497	74,306	78,204	82,253	87,570	91,734	95,877
2015	2016	2017	2018	2019	2020	2021 (Budget)	2022 (Budget)	2023 (Budget)						
98,326	99,903	102,188	104,319	107,812	121,486	128,390	132,890	138,312

Source: "Survey of Long-term Care Benefit Expenditures", "Statistics of Long-term Care Benefit Expenditures" (examined as of April of each year) by Social Statistics Office to the Councilor, Director-General for Statistics, Information System Management and Industrial Relations, MHLW
 (Note) Community-based services, community-based services for preventive long-term care, and preventive long-term care services have been introduced since April 2006.

Periodic or on-call home-visit long-term care and nursing care, and combined multiple services have been introduced since April 2012.

Community-based outpatient day long-term care has been introduced since April 2016.

Integrated facility for medical and long-term care service has been introduced since April 2018.

The home-visit care for preventive long-term care and the outpatient preventive long-term care have been transferred until the end of FY 2017 to the long-term care and life support projects of the comprehensive services for long-term care prevention and daily life support.

Financial Status of Long-Term Care Insurance System

Overview

Financial Status of Long-Term Care Insurance System

*1 The percentages are based on the statistical proportion of the primary and secondary insured persons for the period FY2021-2023 (the corresponding percentages were 17% and 33% for FY2000-2002, 18% and 32% for FY2003-2005, 19% and 31% for FY2006-2008, and 20% and 30% for FY2009-2011, 21% and 29% for FY2012-2014, 22% and 28% for FY2015-2017, 23% and 27% for FY2018-2020 respectively).

*2 5% of the national fund shall be appropriated for the adjustment of gaps of municipalities' finance (grant proportions differ depending on municipalities).

(Rational for adjustment)

[1] Different proportion of later elderly person's participation.

[2] Different burden bearing capabilities of the elderly (numbers of insured people by income level)

[3] Reduction or exemption of premium and users' fees at the time of disasters (special adjustment)

3 The burden bearing ratio of benefit expenditure concerning Long-Term Care facilities, etc.() since FY2006 is as follows: (*) 3 types of the Facilities Covered by Long-Term Care Insurance and the Specified Facility Designated by prefecture

Nation 25% → 20%

Prefecture 12.5% → 17.5%

*4 Since FY2015, public funds have been used separately to reduce the amount of insurance premium for persons with low income (by the central government, prefectures and municipalities).
